Filing Description:

Pekin Insurance is submitting a filing for your review. With this change we are implementing a new rating factor in the building and business personal property rate routines. This factor is a multiplicative factor that rates based on the address and occupancy of the building. We are implementing a rating factor based on Octagram's FireRQ that leverages 1.5 million fire events reported by United States Fire Departments to make a pinpoint prediction of the fire risk for any address and occupancy in the United States. The effective date for this change is 4/23/2026.
