Form HO-6 Homeowner Program

New Insurance Score Definitions

Homesite Insurance Company of the Midwest (“Homesite”) has updated its insurance score model to the TrueRisk Auto-Property Insurance Score. TrueRisk range definitions will replace the Trans Union Insurance Risk Score (TUIRS) for new business and in cases where policyholders request an insurance score reorder. The TrueRisk ranges were developed to align as closely as practicable with existing TUIRS ranges so that customers are assigned to comparable ranges. The Owners rates manual has been updated where appropriate. This change applies only to new policyholders and to existing policyholders who choose to reorder their credit score. There is no rate impact from this change.
