

The Hartford Personal Automobile Underwriting Eligibility Criteria Unacceptable Vehicles Hartford Fire Insurance Company

Refer to state new business underwriting guidelines for instructions on how to evaluate these exposures.

Unacceptable Vehicles

Certain vehicles present a risk of loss greater than contemplated by our Standard Auto Plan. Typically these are high performance, extreme value, limited production, exotic vehicle types, or those with a demonstrated higher-than-average loss incidence or below average safety record. The following is our current listing; as makes and models change we reserve the right to change this list and to evaluate each risk based on its own exposure to loss.

In addition to the makes / models listed below, excluded vehicles include exotic cars, kit cars, gray market types, fully autonomous vehicles, autocycles, vehicles with a new cost or current value over \$150,000 (\$175,000 in Prevail plan), and pickups or vans with a gross vehicle weight of greater than 10,000 lbs. This category also includes any customized vehicle, any vehicle with modified suspension or those changed to be one-of-a kind (i.e. street rods, etc.), as well as vehicles used for racing or for use off-road.

The following vehicle makes are unacceptable:
